3 Caves Villa | Santorini

Eleni Sfikaki, 21/01/2019

3 original cave-homes, joined as one building, located at the most photographed part of Oia.

The residence «3 Caves Villa» is located at the most photographed part of Oia, at the Cliffside, overlooking the Aegean and the caldera. The original cave-homes, dating from 1987, were joined as one building of 85 m2 and renovated in 2018. In the inner part of the cave you will find the bedroom, which is located overlooking to the main entrance and the daily light. Inside the bedroom is the open-air wardrobe with air suspension, which can be autonomous using a white gauze curtain. The room is separated from the communal space, by a metallic wall with transparent crystals, which also has shade and privacy features.

The bath is a part of the second and third cave with its two domes and is covered with cement mortar to highlight the natural landscape. The kitchen is a private space with an open -to the living room- arch, that houses the oak veneer table and unites it inwardly. Designed in simple lines, the kitchen consists of built-in sections with cement mortar and is framed by black metal and wooden shelves in a natural oak. The main area consists of the main living room, a relaxing corner with armchairs and a bar. Plants adorn the interiors, giving the feeling of liveliness and familiarity. The residence features a private balcony, including an outdoor Jacuzzi, with a lounge and views of the enchanting caldera.

The flooring has been made of cement screed in beige shades, while the walls are covered with white coat, so that the reflections of light highlight the curvature of the dome of the cave. Natural materials such as bamboo, straw, linen, wood and metal in black, gold and white, have been used in the decoration.
