# Guest House in Vonitsa

This guest house located in Vonitsa on the south side of Amvrakikos Gulf is set in green surroundings amongst an olive grove and pomegranate, lemon, and orange trees. The stone and wood building has been remodeled and now consists of an open-plan first floor with living room, kitchen, and toilets, and second floor with guest bedrooms and main bathroom.

The first floor patio has a spacious dining area with wood and metal table and chairs. Shades of gray are used in the living room to balance the stone walls and wooden floors. Family antiques decorate the room and an old wooden trunk serves as a coffee table. Clear crystal chandeliers add a touch of glamor and the unobtrusive curtains allow for undisturbed views outside.

An arched opening in the stone wall connects the living room and kitchen. The kitchen cupboards are oak veneer and the bench is solid oak. The wooden dining table is rustic, and a wooden trough, hung upside down, takes the role of ceiling lamp. The first floor bathroom has a stone sink, granite bench, and various bronze accessories.

The master bedroom on the second floor has wooden carvings and lamps and artworks depicting skiers. The children's bedroom is more simplistic and has a stone wall as the predominant feature. Upturned metal buckets are used to light the central corridor and the main bathroom has a mirror composed of twigs and branches.

Outdoor furnishings on the balcony enable guests to eat and relax outside while enjoying the views of the Amvrakikos Gulf.
